

# 4.4 Concept Visualization 1

Shaun Altmann (221260334)

For the control structures image, I have a little vector image which shows a very basic depiction of how instructions are completed. Underneath each image, I have the name of the control structure, as well as a short description of what it is. Along with each, I have also included a real-world example to help simplify understanding. For the OOP image, I have a section for each area with a short description and a little image depicting the value being described.

I have not integrated actual code into any of the graphics to help increase this graphic's ability to explain concepts to a larger variety of users that may use different languages.
